

24-HOUR MONITORING SERVICE

Fire Alarm and Security Systems

CENTRAL STATION, TELEPHONE DIRECT CONNECT AND RADIO NETWORKS

Your Fire or Security System must be monitored. Monitoring is the connection between your system and the local dispatch center. As a licensed contractor, Fox Valley Fire & Safety can provide the system that is right for you. A horn or siren sounding will not automatically notify authorities in the event of a fire or breach of security. Code requirements for monitoring are met by the use of telephone lines or two-way wireless radios to send signals to the local municipal dispatch center or to a UL approved Central Station.

Central Stations use radio signals or telephone lines, and trained staff to monitor their customer's fire alarm and security systems and call the appropriate authorities when an alarm is received.

Fox Valley Fire & Safety provides two-way wireless monitoring. This new technology is available in many areas. It creates a continuous, reliable connection to alert the receiving center of an emergency and eliminates the expense of dedicated telephone lines. It's a reliable, inexpensive solution to life safety and property protection.

We can provide monitoring of other critical systems and equipment, such as sump pumps, water flow and tank levels, elevator telephones, high temperature conditions for refrigerators or low temperatures in sprinkler rooms. The possibilities are endless.

KELTRON RADIO NETWORKS For Municipalities and Fire Protection Districts

Fox Valley Fire & Safety provides customized, powerful, upgradable hardware and software. This network is cost effective, interfaces to new or existing systems and saves the expense of telephone line connections. Keltron's Wireless Radio Monitoring Network provides a two-way, continuous, reliable connection to assure life safety and property protection.

Are you comfortable relying on the telephone lines to send the signals of your fire and security systems protecting the lives of the people in your community? Fox Valley Fire & Safety can provide your municipality with more reliable, less expensive alternative... Keltron's Wireless Radio Monitoring Network.

EXPERIENCED. KNOWLEDGEABLE. RELIABLE. COMPREHENSIVE. INNOVATIVE.
