

SECURITY

COMMERCIAL AND RESIDENTIAL SECURITY ALARM SYSTEMS

Your business requires security to protect your assets. When a break-in occurs we promptly notify the authorities and you. As a licensed alarm contractor, we install, service and inspect Honeywell security system equipment, which can also monitor changes in temperature or a water emergency. Whether the system is for new construction or in an existing building, your Fox Valley Fire & Safety account representative will design a security system to meet your needs.

ACCESS SYSTEMS

Your keys can be duplicated by anyone. Our Access System gives you control over who has access and when they can gain entry to your building. Doors used for customer and public access can be locked automatically at a time you choose. Whether you have one building or multiple locations, you have control of employee access by the use of a keypad, proximity card, key tag, fingerprint reader or photo ID rather than a traditional key.

CAMERA SECURITY SYSTEMS (CCTV)

Wouldn't you like to see everything that happens at your workplace? You can view, by remote site management, what is happening at another branch, or your home, when you are not there. Our camera systems record activity for your review. Whether you need indoor or outdoor cameras, we will service, design and install a system to meet your needs.

DOOR ENTRY SYSTEMS

Unsecured doors and unauthorized visitors can lead to security concerns for a school or business. The doors of multi-family residential, mixed retail/residential locations or office buildings cannot be left unlocked. Tenants and business owners need to control access and then manually release the doors to permit entry.

HOME SECURITY / MUSIC INTERCOM AND CENTRAL VACUUM SYSTEMS

The greatest asset of a security alarm system in your home is knowing that when you enter your home it's just the way you left it! Easy to use Honeywell keypads will indicate a breach to your home security and immediately notify you and the authorities. If you travel for extended periods of time our system monitors for fire, a water emergency or critical temperature fluctuations to provide true peace of mind. You can also add emergency medical assistance for a family member with health concerns.

Music intercom systems can provide music throughout your home and add an additional level of security by allowing entry doors to be monitored. Whether you have a home-based office or just want to communicate with family members Fox Valley Fire & Safety will custom design a system to meet your needs.

Central vacuum systems are installed into new homes to provide better quality air for health and well being, convenience, and easier cleaning. In homes where tile or hardwood floors are present, a toe-touch inlet will whisk away debris; no dustpan or bending required!

EXPERIENCED. KNOWLEDGEABLE. RELIABLE. COMPREHENSIVE. INNOVATIVE.
