The IntelliQuad™ PLUS is a combination photoelectric, thermal and infrared detector that has a separate carbon monoxide (CO) element for life safety CO detection. The IntelliQuad™ PLUS detector works with the NOTIFIER B200S sounder base. The B200S produces both Temporal 3 and Temporal 4 patterns for fire or CO notification. Together these devices create an integrated, functional, system.

**Superior Detection**
The IntelliQuad™ Advanced Multi-Criteria Fire Detector component uses four sensing elements for superior smoke detection and nuisance rejection. The CO detection is the same technology used in our CO1224T, which includes RealTest®, the first field functional CO test fully compliant with NFPA 720-2009 requirements. The B200S sounder base ties the system together with the appropriate temporal signals, and because it synchronizes with System Sensor A/V devices, it can act as part of the evacuation signal.

**Efficient**
This multi-functional device eliminates the need for a separate CO detector, smoke detector, mini horn, monitor modules, and all of the associated wiring and junction boxes. There’s only one device to wire, one junction box, and one address – a much more efficient system.

**Applications**
The primary application is commercial sleeping spaces, including hotels/motels, managed-care facilities, hospitals, apartment buildings, college dormitories, and military housing. Other applications are rooms with or near fossil-fuel-burning appliances, such as laundry rooms, rooms with a gas fireplace, and mechanical rooms.
### Hotels and Motels

**Areas of Concern**
- Sleeping Rooms
- Kitchens
- Rest Rooms
- Server / Electrical Rooms
- Laundry Rooms

**Problems**
- Smoking, CO Detection
- Nuisance
- Early Warning

**Solutions**
- IntelliQuad PLUS
- IntelliQuad
- FAAST

**Hotels and Motels**
- NFS2-640
- FSL-751 VIEW Detector
- FCO-851 IntelliQuad PLUS with Addressable Sounder Base
- FSC-751 IntelliQuad Multi-criteria Detector

### Colleges and Universities

**Areas of Concern**
- Dormitories
- Kitchens
- Telecommunications / Server Rooms
- Science Labs

**Problems**
- Smoking, CO Detection
- Nuisance
- Very Early Detection

**Solutions**
- IntelliQuad PLUS
- IntelliQuad
- FAAST

**Colleges and Universities**
- NFS2-640
- FAAST Aspiration Smoke Detector
- FCO-851 IntelliQuad PLUS with Addressable Sounder Base
- FSC-851 IntelliQuad Multi-criteria Detector
