Keyscan Aurora Add-On and Optional Licensed Modules

Keyscan Aurora software features add-on and optional licensed modules designed for software integration and enhanced overall system functionality

Add-On Modules

Add-on modules are installed as separate applications and registered with a license number provided when you purchase the software. When you register your software online you'll obtain an unlock number to complete the registration and fully enable your software.

Aurora Web-Client (web-based access control)

Aurora's web-client interface add-on allows you limited management of your access control system for any of your facilities at anytime, from any location, using any web-enabled computer or mobile device. It remains the ideal solution for those who need mobility.

Aurora SQL Upgrade

Aurora supports upgrading to a full SQL database removing the 10 GB limit and giving you many more options, features and benefits. Requires server, OS and appropriate licensing for SQL Server 2012.

Optional Licensed Modules

Aurora optional licensed modules are installed during the Aurora installation process. To activate any optional licensed module for use, you need to register a module's license number provided when you purchase the module.

Video Management Software Integration (VMS)

Aurora offers a new and robust VMS platform integration. When licensed, allows Aurora users to open and use client software from leading manufacturers such as Milestone, i3 International, OnSSI, Open Eye, Salient, HIK Vision and Exacq. Contact dormakaba Canada for latest integration compatibility

Intrusion Integration

Aurora allows increased integration with DSC MAXSYS and PowerSeries intrusion panels*. Aurora is designed to accommodate other leading intrusion or security product lines such as the DMP XR550DN series as well as providing Aurora users with even more versatility.

* Does not support PowerSeries Neo

*may require additional hardware and software

BioConnect
Keyscan Aurora software version 1.0.14 or higher now integrates with BioConnect software to give you functionality with Suprema's new generation of biometric readers for your Keyscan access control system. IP based fingerprint and facial recognition access control devices feature easy installation and user-friendly operation. They are available for biometric and/or card reading capability within Keyscan Aurora environments.

EasyLobby
Keyscan Aurora access control management software is built with a visitor management feature to easily schedule, track and generate full reports on visitors to your facility. For facilities that require a more progressive visitor management system, Keyscan Aurora offers integration with EasyLobby® Visitor Management software. EasyLobby allows for manual or automated recording and collection of visitor data, for the purpose of knowing who is in your facility, who they are visiting, and for how long.

Active Directory
Active Directory integration with Keyscan Aurora Version 1.0.17 or higher. With the new Keyscan Aurora release, people may be linked to their Active Directory record. Active Directory expedites system user permissions and day-to-day activities with Aurora. Not available through distribution. For information, contact dormakaba Canada for details 1 888 539-7226

Software Developers Kit
SDK (Software Development Kit) is an application programming interface (API) that harnesses Keyscan's Aurora functionality from within another application. It is ideal for custom integrations to make Aurora function seamlessly with existing software platforms. Contact dormakaba Canada for details 1 888 539-7226

SAFLOK integration
Saflok Access Control Management and Keyscan Aurora seamlessly integrate for a complete access control solution for lodging and multihousing customers. It is a cost-effective and scalable solution compatible with Saflok lock models including Quantum and MT series, RT, Adese and Confidant RDID. Together the integration provides a solid platform for both front of house and back of the house access control.
